Objectives

A passionate Full Stack Developer with expertise in frontend, backend, and DevOps technologies. I excel in creating seamless and dynamic web applications. Transform your vision into stunning digital reality with expert development services tailored to your unique business needs.

Experience

INTERNSHIP ▪ Web Development training

Skills

TECHNICALS :

- **Front-End Technologies:** HTML , Java script , React, Tailwind CSS
- **Back-End Technologies:** Node.js , Express(EX),Hono, Zod, Next.js, RESTful APIs
- **Databases:** MongoDB, PostgreSQL, MySQL
- **DevOps and Deployment:** CI/CD , Pipelines, Kubernetes

PROJECTS:

Todo Application

Developing a to-do app with Node.js, MongoDB, Express, and React involves creating a backend with Node.js and Express for API endpoints, using MongoDB for database storage, and building a frontend with React for a responsive user interface. Integrating these technologies allows for a full-stack application capable of managing tasks efficiently.
